

Fertile Volcanic Mountain Soil

The raw coconuts are taken from Semeru mountain cliff area, an active volcanic mountain in East Java. It's fertile soil rich with authentic natural material for the grown-up of the coconut as well as provide high quality natural healthy substance for human.

Non Heated Process

The extra VCO is extracted from premium coconut milk. It is fragmented and processed with non heated method ensuring the natural authentic substance is preserved and non defective.

Extra Virgin Coconut Oil (VCO) —TREESCOCO

TREESCOCO extra virgin coconut oil provides moisture and lauric acid. Lauric acid and it's derivation, monolaurin, nowadays are widely use for medicine, sanitation and food preservation.
